

Martin's Walk the Belt™ Program provides a **FREE comprehensive review of your belts** from head pulley to tail pulley while looking for ways to improve safety, productivity, and regulatory compliance.

Our trained experts will walk your conveyor belts, inspect your material handling system, record data, and provide an immediate detailed report outlining the overall condition of your system.

Walk The Belt™ Report Covers:

- Maintenance needs
- Potential equipment failures
- Safety hazards
- Long-term system improvement opportunities
- Valuable information used to prioritize needs and eliminate the risk of spending money in the wrong places

Benefits:

- Improve safety
- Keep the conveyor system running at maximum productivity
- Save time and money by avoiding unexpected failures
- Effective upkeep lowers overall operating costs
